Proceedings of the 9th International Conference on Auditory Display

July 6-9, 2003

Boston University, Boston, MA, USA

Financial support for ICAD 2003 was provided by
COMMITTEES AND VOLUNTEERS

ICAD 2003 Organizing Committee

General Chair
Barbara Shinn-Cunningham, Boston University

Technical Program Chair
Abhijhit Kulkarni, Bose Corporation

Treasurer
Barry Blesser, Blesser Associates

Committee Members
Nat Durlach, Boston University and MIT
Simon Carlile, University of Sydney
Matti Gröhn, Helsinki University of Technology
Greg Kramer, Metta Foundation
Eric Somers, SUNY Dutchess
Bruce Walker, Georgia Institute of Technology
Elizabeth Wenzel, NASA Ames

Workshop Organizing Committee

Ramani Duraiswami, University of Maryland
Nat Durlach, Boston University and MIT

Barbara Shinn-Cunningham, Boston University
Bruce Walker, Georgia Institute of Technology

Conference Support and Coordination

Conference Coordinator
Joan Brown, Boston University

Administrative Assistant
Nancy Maguire, Boston University

MIT Media Lab Reception Coordinators
Nyssim Lefford, Kristie Thompson
Lorin Wilde

Proceedings Editors
Eoin Brazil, University of Limerick
Barbara Shinn-Cunningham, Boston University

Web Masters
Jeffrey Lindsay, Georgia Institute of Technology (main ICAD 2003 site)
Yang Wang, University of Maryland (submission, registration)

Student Volunteers
Suzanne Carr, Sasha Devore, Antje Ihlefeld, Kosuke Kawakyu, Patricia Moy, Yusuke Naka, Gerald Ng, Becky Poon, Suraj Ram, Jake Scarpaci, Tim Streeter, Sanaz Zalehdoust Sani

Paper Review Committee

Masato Akagi John Flowers Tappio Lokki Vesa Valimaki
Jim Alty Elena Grassi William Martins Bruce Walker
Stephen Barrass Matti Gröhn Joshua A. Miele Elizabeth Wenzel
Durand Begault Shrin Hassan John Neuhoff Beverly Wright
Barry Blesser Thomas Hermann James Oliverio Nick Zacharov
Terri Bonebright Jyri Huopaniemi Catherine Plaisant Pavel Zahorik
Simon Carlile Craig Jin Ville Pulkki Dmitry Zotkin
Michael Cohen Matti Karjalainen Lauri Savioja
Chris Darwin Abhijit Kulkarni Malcolm Slaney
Alistair Edwards Greg Kramer Eric Somers
WELCOME

On behalf of the ICAD 2003 Organizing Committee, it is my honor to welcome you to Boston University for the 9th International Conference on Auditory Display.

This is the first time ICAD has been held in Boston and also marks ICAD’s return to the United States after two years of being held in other countries (in Finland in 2001 and in Japan in 2002). It is almost surprising that it has taken nine conferences for ICAD and Boston to meet, for they make a near-perfect match: few places in the world boast as high a density of researchers investigating auditory perception, auditory neurophysiology, audio technology, and audio engineering as the Boston area.

We have assembled what we think is an exciting mix of scientific and social events to make the inaugural Boston ICAD meeting memorable. The one-day workshop on auditory displays in assistive technology brings together academic researchers as well as consultants and practitioners who use auditory displays in real-world applications ranging from museum displays to everyday navigation. The main ICAD conference boasts over 60 technical presentations, selected (after careful peer review by an international panel of experts) from very high-quality submissions. In addition to talks, poster presentations, and what we hope will be a provocative panel discussion (“Science vs. Art in Auditory Displays”), we will visit the MIT Media Lab to see how technophiles use audio in displays. The social events (an informal pizza party, a “Duck Boat Tour” of Boston, the conference banquet, a reception at the Media Lab) are designed to nurture the already-strong camaraderie of the ICAD community and provide informal opportunities for ideas to be exchanged, discussed, and argued with a healthy give and take.

While we are here because of shared intellectual interests, we hope you take time to enjoy Boston during your stay. Walk the Freedom Trail; visit the Old North Church, Faneuil Hall, and Quincy Market. Between the laid-back nightlife of Harvard Square, live music clubs in and around Central Square, sports venues, museums, and other sights in and around Boston, there is something in our friendly city to appeal to everyone.

Generous financial support from the Boston University Hearing Research Center, the Air Force Office of Scientific Research, and Tucker-Davis Technologies allowed us to offer substantial subsidies to many student and post-doctoral participants and offset other ICAD 2003 meeting costs. Nancy Maguire and Joan Brown assisted mightily with administrative and logistical planning. The members of the ICAD 2003 Organizing Committee, particularly treasurer Barry Blesser, were extraordinarily generous with their time, ensuring the success of ICAD 2003. Many student volunteers will be helping in a variety of ways, down to guiding the ICAD community through the Boston subway system. However, more than anything else, the enthusiasm and dedication of the participants is responsible for the success of any conference. Thank you all for making this conference, and the ICAD community, as strong as it is. Because of you, it has been a pleasure to put together the program you are about to enjoy.

I look forward to seeing you all in Sydney for ICAD 2004!

Barbara Shinn-Cunningham
General Chair, ICAD 2003
Table of Contents

Committees and Volunteers iii
Welcome v
Table of Contents vii

Biological Communication Sounds

Vocal pedagogy and pedagogical voices (invited talk) 1
G. Wakefield

Communicating with sound: An ethological perspective (invited talk) 12
T. Fitch

Discriminating visible speech tokens using multi-modality 13
C.S. Campbell, S.K. Lodha, M.M. Shafae, and D.W. Massaro

Spatial Auditory Perception

Two-point discrimination in auditory displays 17
V. Best, A. van Schaik, and S. Carlile

Identifying where you are in a room: Sensitivity to room acoustics 21
B. Shinn-Cunningham and S. Ram

A study on sound source apparent shape and wideness 25
G. Potard, and I. Burnett, I

Parameters for auditory display of height and size 29
D. Cabrera and S. Tilley

Sound Design and Earcons

Reality (sound)bites: Audio tricks from the film and TV studio (invited talk) 33
J. Rose

Combining speech and earcons to assist menu navigation 38
M.L.M. Vargas and S. Anderson

An investigation into the identification of concurrently presented earcons 42
D.K. McGookin and S.A. Brewster

Perceptively based design of new car horn sounds 47
G. Lemaitre, P. Susini, S. Winsberg, and S. McAdams

Algorithmic Composition

Ocean buoy spectral data sonification: Research update
  B.L. Sturm
  For those who died
  M. Quinn, W. Quinn, and B. Hatcher

Designing Effect Displays

Sonification design patterns (invited talk)
  S. Barrass

Design process for auditory interfaces
  S. Daudé and L. Nigay

Audiocentric interface design: A building blocks approach
  C. Thornton, A. Kolb, F. Gemperle, and T. Hirsch

Acqua alta a Venezia: Design of an urban scale auditory warning system
  F. Avanzini, D. Rocchesso, A. Dal Palù, A. Belussi, and A. Dovier

Spatial Auditory Displays

Optimizing the spatial configuration of a seven-talker speech display
  D.S. Brungart and B.D. Simpson

Using multi-channel spatialization in sonification: A case study with meteorological data
  E. Childs and V. Pulkki

Spatially-modulated auditory alerts
  D.R. Begault, M.R. Anderson, and B.U. McClain

Comparison of auditory, visual, and audio-visual navigation in a 3D space
  M. Gröhn, T. Lokki, and T. Takala

Effect of beacon sounds on navigation performance in a virtual reality environment
  B.N. Walker and J. Lindsay

Sonification

Broadcasting auditory weather reports: A pilot project
  T. Hermann, J.M. Drees, and H. Ritter

Educational testing of auditory display regarding seasonal variation of Martian polar ice caps
  J. Keller, E.E. Prather, W.V. Boynton, H.L. Enos, L.V. Jones, S.M. Pompea, T.F. Slater, and M. Quinn
Auditory Display Examples

Audio games: Fun for all? All for fun?  
S. Targett and M. Fernström  
216

"LISTENIN" to domestic environments from remote locations  
C. Schmandt and G. Vallejo  
220

Household appliances control device for the elderly  
224

Auditory Display Dimensions

Sound-discrimination learning and auditory displays (invited talk)  
B.A. Wright and M.B. Fitzgerald  
228

Dynamic auditory cues for event importance level  
J. Häkkilä and S. Ronkainen  
233

A new experimental technique for gathering similarity ratings for sounds  
E. Brazil, L. Ottaviani, and M. Fernström  
238

Sonification of absolute values with single and multiple dimensions  
A. Sandor and D.M. Lane  
243

Auditory Display System Architecture

Interactive visualization and sonification for monitoring complex processes  
T. Hermann, C. Niehus, and H. Ritter  
247

NeMoS: Network monitoring with sound  
D. Malandrino, D. Mea, A. Negro, G. Palmieri, and V. Scarano  
251

Spatial Auditory Synthesis

Perceptual spatial-audio coding  
C. Jin, A. van Schaik, V. Best, and S. Carlile  
255

Subjective selection of non-individual head-related transfer functions  
B.U. Seeber and H. Fastl  
259

Individualized and generalized earphone correction filters for spatial sound reproduction  
W.L. Martens  
263

A spatial audio user interface for generating music playlists  
J. Hiipakka and G. Lorho  
267
Auditory Displays In Assistive Technologies (Papers)

Auditory assistive devices for the blind (invited talk)  
*R.W. Massof*  
271

Maximum listening speeds for the blind  
*C. Asakawa, H. Takagi, S. Ino, and T. Ifukube*  
276

3d audio interfaces for the blind  
*C. Frauenberger and M. Noisternig*  
280

Design guidelines for audio presentation of graphs and tables  
*L.M. Brown, S.A. Brewster, R. Ramloll, M. Burton, and B. Riedel*  
284

Smith-Kettlewell display tool: A sonification toolkit for Matlab (invited talk)  
*J.A. Miele*  
288

Perceptve study and recommendation for sonification categories  
*P. Susini, P. Gaudibert, E. Deruty, and L. Dandrel*  
292

Boardskatter: Initial experiences and open problems in prototyping a talking digital whiteboard to assist visually impaired students  
*D. Berque*  
296

Basic and applied research relating to auditory displays for visually impaired people (invited talk)  
*J.M. Loomis*  
300

Soundview: Sensing color images by kinesthetic audio  
*K. van den Doel*  
303

Auditory Displays In Assistive Technologies (Abstracts)

A case study in the design of software that uses auditory cues to help low vision students view notes on a blackboard  
*D. Berque, T. Bonebright, S. Kinnett, N. Nichols, and A. Peters*  
307

Sonification of dynamic choropleth maps: Geo-referenced data exploration for the vision-impaired  
*H. Zhao, C. Plaisant, B. Shneiderman, D.N. Zotkin, and R. Duraiswami*  
307

Sonification of SQL constructs in multi-modal database interaction  
*T. Stockman*  
308

WYSIWISH- What you see is what I hear: Giving blind users access to visual collaboration  
*F. Winberg*  
308

A game for visually impaired children with a 3-d virtual auditory display  
*M. Ohuchi, Y. Iwaya, Y. Suzuki, and T. Munekata*  
309
